

TROUT IN THE CLASSROOM 2020 VIRTUAL WORKSHOP

**MONDAY, JUNE 15, 2020
12:30 P.M. - 3:30 P.M.**

Have you ever wondered if Trout in the Classroom (TIC) would be a good fit for your school?

We will be exploring:

- How to get involved in the program
- Educator experience with the program
- Hatchery Sciences
- Aquatic Animal Health
- How to maintain a healthy cold-water ecosystem

About the program: Trout in the Classroom (TIC) is a conservation-oriented, environmental education program for elementary, middle and high school students. Throughout the school year, students will raise trout from eggs to fry; monitor tank water quality; engage in stream habitat study; learn to appreciate water resources; begin to foster a conservation ethic; and grow to understand ecosystems. Most programs end the year by releasing their trout in a state-approved stream near the school or within a nearby watershed. During the year each teacher tailors the program to fit his or her curricular needs. Therefore, each program is unique. TIC has interdisciplinary applications in science, social studies, mathematics, language arts, fine arts and physical education.
